

# BramTECH

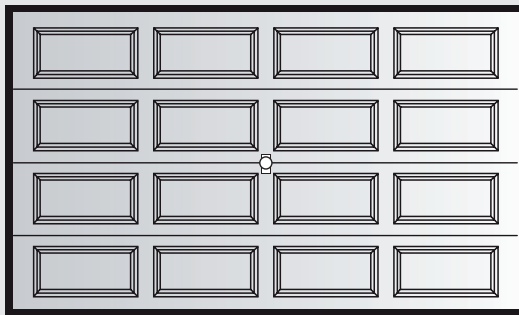

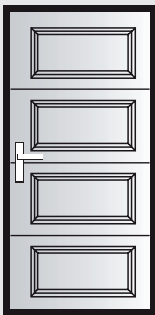

**PRODUCER OF SECTIONAL DOORS**  
INDUSTRIAL GATES & GARAGE DOORS

## Satisfaction

Construction elements are made of galvanised steel or – at customer request – of surface-treated stainless steel that is specially designed for aggressive environments such as carwashes, dairies, stables, etc. The entire perimeter of each gate is sealed with rubber sealing.

## Cassettes – Quadro

White - RAL 9010

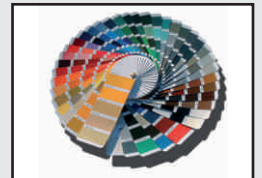

Brown - RAL 8014

Golden oak

Hazel

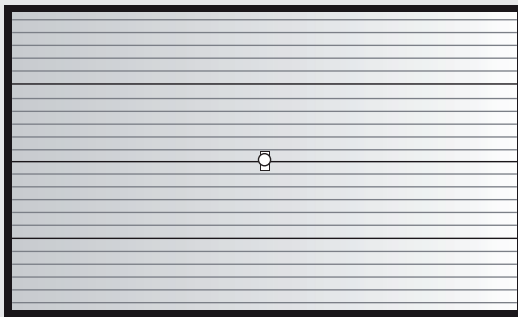

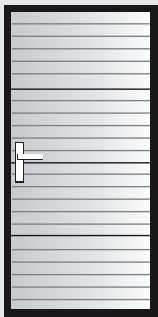

Painted in a chosen RAL colour

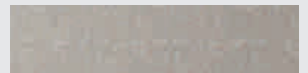

**Harmony and aesthetics**

In our garage doors we use 40mm thick panels filled with polyurethane foam and equipped with finger protection. The panels are available in a variety of exterior surface structures.

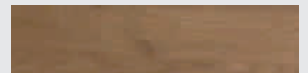

**Panels - exterior surface structures**

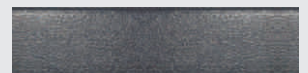

Woodgrain

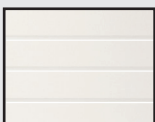

Smooth

Stucco

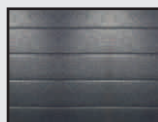

**Thin horizontal ribbings – MULTI LINE**

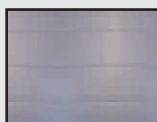

White  
- RAL 9010

Brown  
- RAL 8014

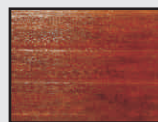

Anthracite  
- RAL 7016

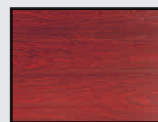

Dark silver  
- RAL 9007

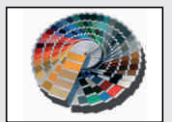

Golden oak

Hazel

Mahogany

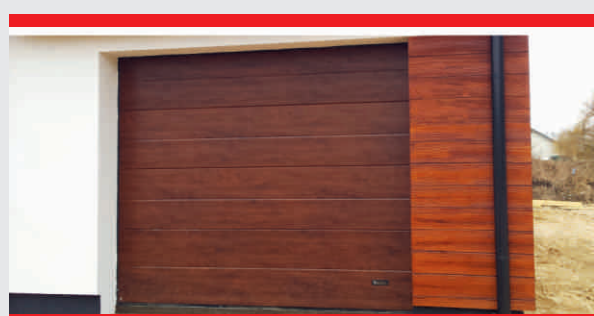

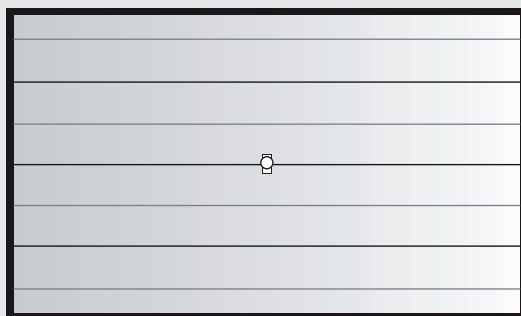

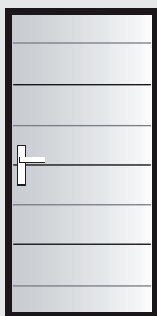

Painted  
in a chosen  
RAL colour

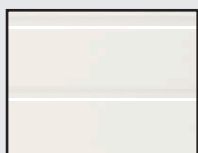

## Variety of systems

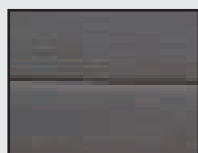

Our doors can be installed both in garages with lintels higher than 7cm, and in production halls, in which one can choose vertical track systems (installed on the same wall as the gate), along the ceiling (diagonally) or on triangular metal sheets (in order to facilitate installation). Installation of track system in the wall opening is possible.

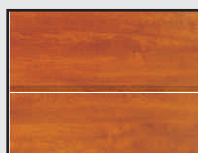

## Broad horizontal ribbings – ONE LINE

White  
- RAL 9010

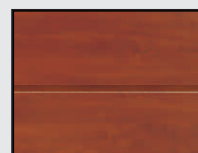

Brown  
- RAL 8014

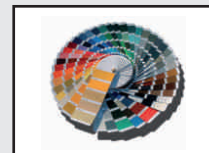

Golden oak

Green oak

Mahogany

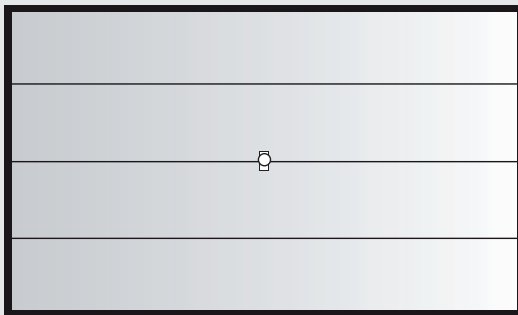

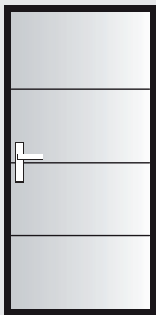

Painted  
in a chosen  
RAL colour

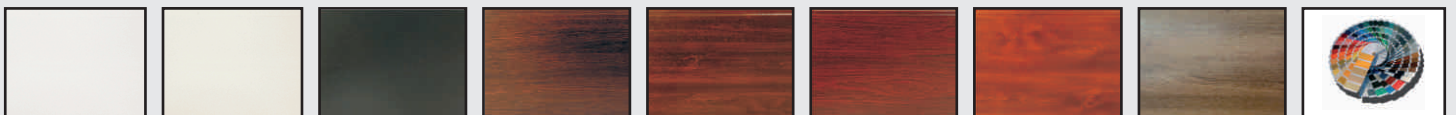

## Security

- Protection in case of wire cracking
- Protection in case of springs snapping
- Photocells installed in power-operated gates.
- Drives equipped with electrical speed control
- Finger protection thanks to special panel profiling
- All gates are marked with a CE certificate that meets the requirements of European EN 13241-1 standard

### No horizontal ribbings – EXTRA

- RAL 7016

**Rustic oak**

**Hazel**

**Mahogany**

**Golden oak**

**Winchester**

**Painted in a chosen RAL colour**

## Industrial gates

Wide choice of industrial gates. Main goals of an industrial gate are closing openings in buildings, protection against weather conditions, increasing thermal insulation and reducing unauthorized access possibilities.

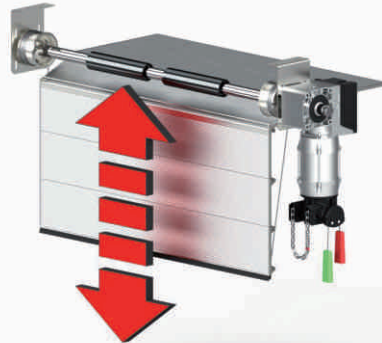

### Narrow horizontal ribbings

Gray white - RAL 9002	Brown - RAL 8014	Silver - RAL 9006	Blue - RAL 5010	Red - RAL 3000	Anthracite - RAL 7016	Dark silver - RAL 9007	Anthracite - RAL 7016	Silver - RAL 9006
MULTI						MICRO		

## Garage doors automation

Our drives are equipped with electronic speed control and a sensor that stops the gate if any obstacle is detected.

## Industrial gates automation

Depending on individual needs of a client, we can install cord strings, transmission chains or electric drive, which guarantees great user comfort.

## Glazings in garage doors

## Service doors

Perfect doors for workshops or production halls. No need to lift the whole gate and cool down the facilities. You can choose one of many options. Welcome!

## Panel front doors

## Side garage doors

**Sectional doors  
with 80mm thick panel**
